Subject: Final Draft RI; EPA Comments and Edits for Sections 1 and 2

Chip and Kristine:

EPA's process for revising the Final Draft Remedial Investigation Report includes a February 12th, 2013, deadline for the LWG to identify issues with EPA's comments on and edits to Sections 1 and 2 that need to be raised to the Senior Management level. Based on our review of EPA's comments and edits to these sections, and the resolutions we negotiated over the past two months, the LWG has decided not to raise any issues with Sections 1 and 2 to the Senior Managers.

We will continue to work with you and your team as additional comments and edits are received for the remaining sections of the RI. Per the agreed-upon process for modifying the Final Draft RI and submitting the Final RI, because the sections of the RI are interdependent the LWG reserves the right to invoke dispute on any comment or edit once we are in receipt of EPA's comments and edits on all sections of the document (including appendices and attachments).

Thanks,

Jim McKenna
